AMD Code Auditing Masterclass

Audit Competition

Instructions:

1. Examine the contents of **myreader.c** file. You are not expected to know what the code is doing but getting an idea of what it does can be extremely helpful in your investigation.

2. Use your investigative skills to find the **true origin** of this source code. Use any tools at your disposal (search engines, GitHub search).

3. Once you are convinced of the true source, record the following info:
    a. The name of the Open Source library to which this file belongs
    b. A version. If the file is present in multiple versions, pick the latest one.
    c. The Open Source License under which the file is released.
    d. The Homepage (URL) of the library.

4. BONUS Tie breaker: share any interesting litigation history that you were able to find that involved the use of this particular source code.
